

I am adamantly opposed to any more media consolidation. We need MORE independent media, not less. I am very concerned about the lack of objectivity already existing in the news media, as evidenced by the lack of reporting in the mainstream media of this very issue! Your planned changes will make the existing lack of objectivity worse! The reasoning that the internet is an acceptable alternative to mainstream media for the general public to access news and other programming is not true. Most people get their news from TV - and will continue to do so. For the good of the country, please act to retain the current regulations. Thank you.
